Venn diagrams with 3 sets - applications

	masz		

3

50 people were asked what they had for breakfast this morning.

- 27 people had eggs
- 24 had cheese
- 14 had bacon
- 13 had bacon and eggs
- 7 had eggs and cheese
- 3 had bacon and cheese
- 5 had none of the three products.

A B A A B A

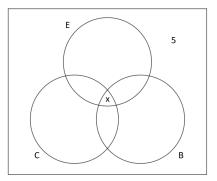

50 people were asked what they had for breakfast this morning.

- 27 people had eggs
- 24 had cheese
- 14 had bacon
- 13 had bacon and eggs
- 7 had eggs and cheese
- 3 had bacon and cheese
- 5 had none of the three products.

Find the number of people who had (i) all three products (ii) exactly one of the three for breakfast.

(4) (日本)

We start by putting 5 outside of the regions and x in the intersection of all 3.

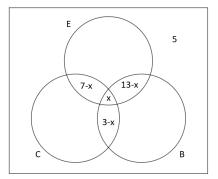

э

< □ > < □ > < □ > < □ > < □ > < □ >

Now we can put 13 - x, 7 - x and 3 - x in appropriate regions:

< □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > <

Now we can put 13 - x, 7 - x and 3 - x in appropriate regions:

Tomasz	

< □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > < □ > <

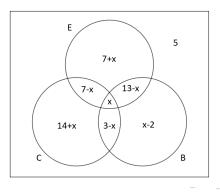

Now the number of those who ate eggs only is 27 - (13 - x) - x - (7 - x) = 7 + x.

▲□▶ ▲圖▶ ▲ 圖▶ ▲ 圖▶ ― 圖 … のへで

Now the number of those who ate eggs only is 27 - (13 - x) - x - (7 - x) = 7 + x. Similarly for those who are cheese only we have 24 - (7 - x) - x - (3 - x) = 14 + x, and for bacon 14 - (13 - x) - x - (3 - x) = x - 2.

▲□▶ ▲□▶ ▲□▶ ▲□▶ □ ののの

Now the number of those who ate eggs only is 27 - (13 - x) - x - (7 - x) = 7 + x. Similarly for those who are cheese only we have 24 - (7 - x) - x - (3 - x) = 14 + x, and for bacon 14 - (13 - x) - x - (3 - x) = x - 2. So we can represent this on the diagram:

ヨ▶ ▲ ヨト - ヨ - - - のへで

We can now form an equation, since the total number of people surveyed was 50, we have:

$$50 = x + (7 - x) + (3 - x) + (13 - x) + (7 + x) + (14 + x) + (x - 2) + 5$$

3

A D N A B N A B N A B N

We can now form an equation, since the total number of people surveyed was 50, we have:

$$50 = x + (7 - x) + (3 - x) + (13 - x) + (7 + x) + (14 + x) + (x - 2) + 5$$

which gives:

50 = x + 47

3

A D N A B N A B N A B N

We can now form an equation, since the total number of people surveyed was 50, we have:

$$50 = x + (7 - x) + (3 - x) + (13 - x) + (7 + x) + (14 + x) + (x - 2) + 5$$

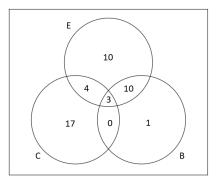

which gives:
 $50 = x + 47$

So
$$x = 3$$

3

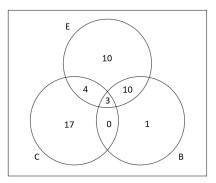

イロト イポト イヨト イヨト

We can now update the diagram:

イロト イヨト イヨト イヨト 二日

We can now update the diagram:

So 3 people had all three products and 17 + 10 + 1 = 28 had exactly one of the 3 products.

Tomasz	

A B A A B A

100 people were asked what they had for breakfast this morning.

- 60 people had eggs
- 51 had cheese
- 32 had bacon
- 31 had bacon and eggs
- 19 had eggs and cheese
- 11 had bacon and cheese
- 8 had none of the three products.

A B A A B A

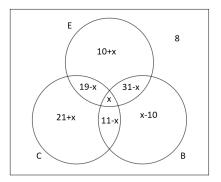

100 people were asked what they had for breakfast this morning.

- 60 people had eggs
- 51 had cheese
- 32 had bacon
- 31 had bacon and eggs
- 19 had eggs and cheese
- 11 had bacon and cheese
- 8 had none of the three products.

Find the number of people who had (i) all three products (ii) exactly one of the three for breakfast.

(4) (日本)

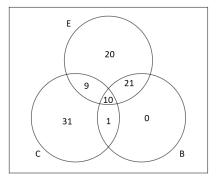

The diagram with x as the variable representing the number of people who had all three products:

э

< □ > < □ > < □ > < □ > < □ > < □ >

We solve for x and find out the x = 10, so the diagram becomes:

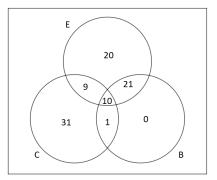

Tomasz		

æ

・ロト ・四ト ・ヨト ・ヨト

We solve for x and find out the x = 10, so the diagram becomes:

10 people had all three products and 51 had exactly one of the 3 products.
