The National High School Data Science Competition

BY VERITAS AI

The world's largest data science competition for high school students

OUR COMPETITION IS ORGANIZED BY THE WORLD'S BEST DATA SCIENTISTS

AWARDS AVAILABLE

The Nation's Biggest Data Science Competition for High School Students

AP Computer Science
& Statistics Teachers

10,000+

Participants in Related
Data Science Programs

2000+

AP Computer Science
& Statistics Teachers

$10,000+

equivalent (in data science
courses and other scholarships)

LETTER FROM THE FOUNDER

My first experience with data science was as a sophomore at Harvard. One class across computer science and statistics showed me that simple patterns can help us understand and categorize the world. I was hooked. For the next five years, I'd study AI and work as a data scientist. But, as I did, I wished I'd started earlier.

The National High School Data Science Competition is a unique competition that lets you showcase your skills and create unique, innovative projects with real-world impact. It is run by the best in the field - AI and data science groups across Harvard, MIT, and Stanford. If you are serious about AI and data science, welcome. It will not be easy. But, I know it will be worth it.

STEPHEN TURBAN
Harvard College '17

COMPETITION TRACKS

DATA SCIENCE TRACK

Analyze a dataset to predict the "college happiness score" as accurately as possible, while providing an effective explanation of the methodology used.

To participate, you will need to submit:
A) your code
B) your predictions
C) a write-up of how you approached it

Check out the dataset HERE and competition guidelines HERE

AI PROJECT TRACK

Create your own AI project (technical or non-technical) using AI in one of the following categories:

• AI & Art   • AI & Healthcare/Biology
• AI & Social Impact   • AI & Gaming
• AI & Business

Participants will be evaluated on their:
• Originality
• Relevancy to the topic
• Potential for real world impact
• Use of AI and it's techniques

Check out the competition guidebook HERE!

FAQS

Do I have to pay to participate?
> No, the competition is completely free to participate in.

Who can apply?
> The Veritas AI National Data Science Competition is open to students worldwide. You must be a student currently enrolled in high school (grades 8-12).

Can I apply for both tracks?
> Yes, you can!

Can I submit multiple entries?
> No! For each track, you can only submit one project/entry.

Is the competition virtual or in person?
> The competition is entirely virtual.

What can I win?
> You can win free enrollment in the Veritas AI Scholars or Deep Dive Programs and other prizes in scholarships
